Glocal University • 2021–2024

## PROJECTS

### Myntra Clone

Responsive Myntra clone web app using React, Redux, HTML, and CSS. Features include filters, sorting, bag, wishlist, view similar products, and search functionality for a seamless user experience. Users can add products to their bag or shopping cart. This feature enables users to collect items they wish to purchase and proceed to the checkout process.

### Rock Paper Scissors Game

Proficient in utilizing front-end technologies such as HTML, CSS, and JavaScript to create responsive and engaging user interfaces. The game is played by two players, who simultaneously choose one of three options: rock, paper or scissors. The game is determined by a simple set of rules: rock beats scissors, scissors beat paper, and paper beats rock. If both players choose the same option, the game is a tie.

### Add To do App

A to-do list is a list of items that need to be completed. The items on the list can range from simple activities like replying to an email, to more complex tasks like creating project briefs. Using technologies to create this project React and redux. its create for frontend which create and delete to do task ...
